PROJECTS

NFT Website (Front-End) *⊘*

The NFT Website Front-End, built with React.js & Bootstrap, delivers a seamless browsing experience for exploring NFTs. With its responsive design and dynamic content, users can easily navigate collections and engage with artwork.

Intelligence Based Counselling *∂*

Intelligence-Based Counselling marks the completion of my Natural Language Processing course, serving as the final project. With the help of pre-built APIs from Rapid API and applying sentiment analysis with specific conditions in JavaScript.

Movie Hub *⊘*

A dynamic React.js website powered by Bootstrap and the Movie API by Rapid API's. Seamlessly browse upcoming, trending, and popular movies with dynamic routing and robust API's handling for a smooth user experience.

Digital Portfolio Website *⊗*

Developed a personalized digital portfolio website utilizing React.js with a distinctive typewriter effect for style, serving as a captivating showcase of my frontend web development portfolio. This innovative design feature enhances my commitment to dynamic and engaging user experiences
